Hepburn Hardware Finishes

Antique Brass

A mottled matte brown antique finish that shows slight highlights of the solid brass hardware underneath.

Burnished Brass

Slightly more golden than straight brushed brass, this matte satin uniformed finish has been created to match back with a few of the most popular satin brass tapware companies.

Carbon Black

A flat matte dark charcoal finish, it shows depth to it's darkness and has a consistent uniformed finish.

Polished Chrome

The hardest and the most durable of our electroplated finishes, polished chrome gives a cooler/bluer undertone with a reflective edge.

Polished Nickel

With a warmer undertone, this easy care reflective finish has a more silvery golden look.

Satin Brass

With a whiskey golden colour, this dark brass tone is warm with a matte satin finish.

Satin Nickel

With visible brush lines, this finish is flat and won't show finger marks. This finish is the most suitable if matching to stainless steel.

Acid Washed Brass

This acid wash treatment will beautifully age the hardware at a much slower rate to raw brass. They are designed to patina over time to give a molten brass look.

Scorched Black

To obtain this charcoal black finish, this hardware has been put in a furnace and burnt. The brass then takes on the mottled scorched black look, which will also patina over time.
